Write characters into a file "filec.txt". The set of characters are read from the keyboard until enter key is pressed.

```c
#include<stdio.h>
#include<conio.h>
int main()
{
   FILE *fp;
   fp=fopen("filec.txt","w");
   if(fp==NULL)
   {
      printf("No file created !!");
      exit(0);
   }
   char ch;
   printf("Enter any character\n(press enter to exit)\n");
   while(1)
   {
      ch=getchar();
      if (ch=='\n')
      {
         break;
      }
      fputc(ch,fp);
   }
   fclose(fp);
   getch();
   return 0;
}
```
