Write a program to declare two integer and one float variables then initialize them to 10, 15, and 12.6. Also print the variable values in the screen.

```c
#include<stdio.h>
#include<conio.h>
int main()
{
    int a,b;
    float c;
    a=10,b=15,c=12.6;
    printf("%d\t%d\t%f\t",a,b,c);
}
```
